Project Design Phase-II
Technology Stack (Architecture & Stack)

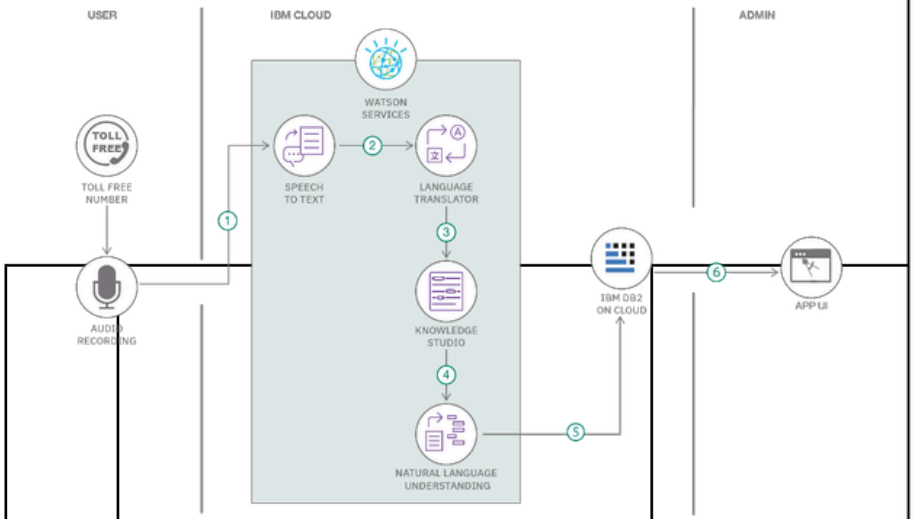

Date	29 September 2026
Team ID	SWTID-2026-3624
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Example: Order processing during pandemics for offline mode

Reference: https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/

Guidelines:

- Include all the processes (As an application logic / Technology Block)
- Provide infrastructural demarcation (Local / Cloud)
- Indicate external interfaces (third party API's etc.)
- Indicate Data Storage components / services
- Indicate interface to machine learning models (if applicable)

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.	HTML, CSS, JavaScript / Angular Js / React Js etc.

2.	Application Logic-1 Application	Logic for a process in the application	Java / Python
3.	Logic-2 Application Logic-3	Logic for a process in the application	IBM Watson STT service
4.	Database	Logic for a process in the application	IBM Watson Assistant
5.	Cloud Database	Data Type, Configurations etc.	MySQL, NoSQL, etc.
6.	File Storage	Database Service on Cloud	IBM DB2, IBM Cloudant etc.
7.	External API-1	File storage requirements	IBM Block Storage or Other Storage
8.	External API-2	Purpose of External API used in the application	Service or Local Filesystem
9.	Machine Learning Model	Purpose of External API used in the application	IBM Weather API, etc.
10.	Infrastructure (Server / Cloud)	Purpose of Machine Learning Model	Aadhar API, etc.
11.		Application Deployment on Local System / Cloud Local Server Configuration:	Object Recognition Model, etc. Local, Cloud Foundry, Kubernetes, etc.

Cloud Server Configuration :

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	List the open-source frameworks used	Technology of Opensource framework
2.	Security Implementations	List all the security / access controls implemented, use of firewalls etc.	e.g. SHA-256, Encryptions, IAM Controls, OWASP etc.
3.	Scalable Architecture	Justify the scalability of architecture (3 – tier, Micro-services)	Technology used
4.	Availability	Justify the availability of application (e.g. use of load balancers, distributed servers etc.)	Technology used

S.No	Characteristics	Description	Technology
5.	Performance	Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc.	Technology used
